

REMARKS**Drawings and Specification**

The drawings have been objected to for failing to specify certain numbers. The drawings have amended herein. Specifically, the reference number 318 was added to Figs. 5A-5D in accord with the description in paragraph [0030] of the specification. Reference number 464 has been changed to 465 in Fig. 6D in accord with the description in paragraph [0034]. Reference number 624 has been added to Fig. 8C in accord with the description in paragraph [0037].

With regard to reference number 618, this element is described in the specification in the last sentence of paragraph [0036]. Applicants respectfully request that the objection to this reference number be withdrawn.

With regard to reference number 464, the second use of this number to refer to the second layer as shown in Fig 6D has been changed to reference number 465 (a reference number not previously used). The corresponding reference in paragraph [0034] of the specification has also been amended. There has been no new matter added as the second layer is sufficiently described in words such that the invention can be understood by one of skill in the art.

Paragraph [0030] of the specification has been amended to fix a typographical error noted by the Examiner. Specifically, reference number 214 has been fixed to be 314, in accord with Fig. 5.

CONCLUSION

The applicant submits that all claims are now in condition for allowance. Should any charges be due, the Commissioner is authorized to charge deposit account No. 50-0496.

Respectfully submitted,

Date: 1-18-07
